

CIDERBOYS™

HARD CIDER

Here at Ciderboys, we use only 100% natural ingredients for every flavor of our award-winning Hard Cider. Along with complexity and creativity, we value consistency. For that reason, we do not rely on one type of apple for our hard ciders, but have selected a blend of six northwest apples to match our desired flavor profile, brix levels. Despite whatever Mother Nature might throw at a particular harvest, we are still able to craft a consistent, modern, new world cider that showcases her natural wonder.

We select our apples exclusively from a single source in Washington state. The special climate and rich soil of the Yakima Valley creates the perfect apple juice for our fruitful pairings. With such a dependable supply and high-quality cider apples, we are able to perfect recipes, innovate new flavors, and conduct rigorous quality tests to bring consistently great products to our happy customers.

CIDERBOYS™
